OVERVIEW

Over the last few years, the need for a reliable tracking system has become undeniable. Be it tracking your vehicle, asset, personnel or kids. This is why we are introducing our comprehensive, yet the most user-friendly tracking system available in the market today. Our product is suitable for individual, diplomatic missions, large and small organizations, travel agencies, etc. to monitor and manage their mobile assets, personnel throughout the country.

Our GPS and GSM based system allows for the “real time” monitoring and management of vehicles, mobile assets, individual or even pets across the country with detailed report of trip, route, speed, distance, mileage report of up to one year.

Our software application is simple to use, yet a comprehensive program that enables authorized person to view, monitor and manage all their mobile assets. We offer comprehensive and fully customizable reports that show how remote assets are being utilized.

OUR PRODUCT

We wish to introduce our new product called **Find-Me** which is the most innovative tracking system in the market today. Our tracking devices are scalable and can offer extensive functionality, depending on your needs. These include Real Time monitoring, geo-fence, over-speed alert, remote immobilization and re-mobilization, fuel sensor, approach to base/location alerts, out of hours usage alert and many more.

Features

- ☐ Real-time tracking
- ☐ Accessible from Anywhere via the Internet Browser and Android App.
- ☐ Easy-to-Use Tools
- ☐ Intuitive Map Controls
- ☐ Multiple Map Styles
- ☐ Tracking History with full report up to 365 Days
- ☐ User-defined Landmarks
- ☐ Messaging Service via Email or Text.
- ☐ SOS alarm
- ☐ Geo-fence alerts
- ☐ Discreet operability
- ☐ Complete covertness
- ☐ High accuracy down to 5 meters

Why Vehicle Tracking

Business Needs:

Have you ever faced problems of vehicle misuse by drivers or staffs?

Have you ever face huge fuel and maintenance bills due to un-productive use of Vehicle?

Have you ever had one of your assets damaged or stolen and been unable to recover the asset or reimbursement for damages?

Do you want to be able to restrict the use of your vehicle based on region?

How do you currently monitor and manage the location or status of your assets?

What provisions do you currently take to protect your assets while they are in storage or travelling out?

Concept:

Vehicles are often damaged, misappropriated, used outside of a permitted area, and even stolen with no way for the company to retrieve it. A GPS platform is a great way to ensure the return of assets. Assets can be tracked when stolen, damage locations can also be determined based on tracking data and can be immediately alerted when their assets leave a designated region or use within a restricted area.

Solution:

On Telematics GPS vehicle tracking system, vehicles can be added to the system and updated with specific information such as driver name, address, phone number and other contact information. These features and many more allow for fleet managers to monitor their assets. Managers can even set a geofence to alert them if an asset leaves a designated area.

How:

You need to keep track of their assets. Otherwise, you will lose cars to misappropriation and theft. Installing a GPS tracking device in each car for quick recovery can prevent these things. Managers can set up geofences that can alert a user when an asset has moved into or out of a set geofence. These easily applied map settings can limit where a rented vehicle can and can't go. Devices can also be configured to set speed limit and alert. Some cars can even be remotely shut off with the help Riddhasoft vehicle tracking system.

Benefit

1. Be Informed

Know where your vehicles are at real time 24/7.

2. Boost in Productivity

When they know they are being closely monitored, fleet drivers will obey guidelines and take the most direct routes to reach the destination on time.

Easily determine if vehicles are in the right place at the right.

3. Cut Fleet Fuel Costs

Reduce the fleet's fuel consumption by monitoring driving routes, speeds, stops, and idle time.

Most drivers will adjust their driving and behavioral patterns to fit within the given rules.

4. Enhanced Safety

Audit driving habits and be automatically alerted of speeding to eliminate poor driving.

5. Eliminate Private Use

Receive Unauthorized Movement Alerts if a vehicle is driven outside of working hours.

Use Historical Route Tracking to see if vehicles deviate from designated course.

6. Improve Customer Service

See if a car that is supposed to be returned is on its way and if the vehicle will be able to get back in time for the next customer

7. Recover Stolen Vehicles

If a vehicle is stolen, the owner can use the GPS tracking device to notify police of its location

8. Timecard Validation

Know the exact time of each vehicle's arrival and departure from a job site or trip along with trip distance and other details.

Pricings:
